**DETAILED ACTION**

1. This action is responsive to papers filed on 5/9/07.

***Response to Amendment***

2. In response to applicant's amendment received on 5/9/07, all requested changes to the specification and claims have been entered.

***Allowable Subject Matter***

3. Claims 1-18 are allowed.

The following is an examiner's statement of reasons for allowance:

4. As to claims 1 and 10, none of the prior art teach or fairly suggest the limitations of "defining means for defining two-dimensional taught models of the object and at least three reference points on the respective two-dimensional taught models" and "reference point position calculating means for obtaining a position of each of the reference points on each of the detected images using positions of the reference points defined on the two-dimensional taught models", in combination with the other limitations of the claims. The prior art of USPN 6,434,278 to Hashimoto, already of record, discloses a position and orientation detecting device for detecting a position and orientation of an object based on two-dimensional images of the object taken from a plurality of different visual points, but does not teach or fairly suggest a defining means for

defining two-dimensional taught models of the object and at least three reference points on the respective two-dimensional taught models and reference point position calculating means for obtaining a position of each of the reference points on each of the detected images using positions of the reference points defined on the two-dimensional taught models, as disclosed in the limitations of claims 1 and 10.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
